

The cost for this work will be \$23,256 (72 samples x \$323/sample). Please let me know if you need additional information for the project agreement. Jill

Robin -

It would be preferable to handle this cross validation in a separate project agreement. I think it will be less confusing from a business standpoint and I believe we can get a project agreement in place fairly quickly. What I will need from Covance is a quote for the work to be performed in accordance with the protocol that been has provided to them.

Jill - can you work with Mark to provide me with a quote? Please let me know.

Thanks,
Valerie
